

# DYNTEK Plasterers' Beads - DYNTEK Angle Bead

DYNTEK Angle Bead (also known as Corner Bead) is used in plasterwork to form a straight edge around outward facing corner.

DYNTEK Angle Bead is manufactured from BS 2989: 1982 conforming pre-galvanised steel. Per BS 6452: Part 1: 1984 specifications, it has expanded mesh wings on both angled sides in addition to a round nosing at the apex. Stainless steel material to BS 1449: Part 2: 1983 Grade 304S15 specifications is also available on request.

#### Benefits:

##### **Enhances Productivity -**

DYNTEK Angle Bead is easy to install and provides efficiently plumbed straightness for plasterwork.

##### **Better Quality Finishing -**

DYNTEK Angle Bead provides better quality finishing by reinforcing corner against cracks and chips.

Product Code	Length (m)	Packing (pcs/pack)
B051	2.7	50
B051S	or	
B053	3.0	

Suffix 's' denotes material in Stainless Steel.

Micromesh Angle Bead (Ref. B053) is for drylining and skim coat applications usually in 3 to 6mm coating thickness.
